EDUCATION

JANUARY 2017 **Ph.D. in Electrical and Computer Engineering**
- DECEMBER 2022 Department of Electrical and Computer Engineering,
(expected) Iowa State University, Ames, IA.
Dissertation: “*Leveraging Redundancy and Coding Techniques for Speeding up Distributed Computing and Securing Distributed Learning.*”
Advisor: Professor Aditya Ramamoorthy.
Current GPA: 3.94/4.0.

JANUARY 2017 **M.Eng. in Electrical and Computer Engineering**
- AUGUST 2022 Department of Electrical and Computer Engineering,
Iowa State University, Ames, IA.
GPA: 3.94/4.0.

SEPTEMBER 2011 **Diploma in Electrical and Computer Engineering (5-year program)**
- DECEMBER 2016 School of Electrical and Computer Engineering,
Technical University of Crete, Chania, Greece.
Thesis: “*Fast Synchronization of OQPSK Signals.*”
Advisor: Professor George N. Karystinos.
GPA: 3.4/4.0.

RESEARCH INTERESTS

- Distributed Computing.
- Machine Learning.
- Network Coding.

ACADEMIC EXPERIENCE

- JANUARY 2017 **Graduate Research Assistant**
- MAY 2022 Leveraging Redundancy and Coding Techniques for Speeding up Distributed Computing and Securing Distributed Learning.
Iowa State University.
- FALL 2020 **Graduate Teaching Assistant**
EE 571: Convex Optimization
Enrollment: 20+ students
Iowa State University.
- SPRING 2019 **Graduate Teaching Assistant**
EE 322: Probabilistic Methods for Electrical Engineers
Enrollment: 70+ students
Iowa State University.
- FALL 2018 **Graduate Teaching Assistant**
EE 322: Probabilistic Methods for Electrical Engineers
Enrollment: 50+ students
Iowa State University.
Received the Teaching Excellence Award upon nomination of the instructor.

GRADUATE RESEARCH EXPERIENCE

- JANUARY 2020 Department of Electrical and Computer Engineering,
- PRESENT Iowa State University.
Project: Securing Distributed Learning Against Failures and Attacks
Description: Developed novel filtering and detection mechanisms for distributed machine learning scenarios in which computing devices may return erroneous or malicious gradients, which can derail the training. *Coding-theoretic* ideas are paired with *design theory* to minimize the fraction of corrupted computations. *Graph theory* is combined with computational redundancy to optimally assign tasks to devices, and *clique-finding* allows for the detection and exclusion of misbehaving devices from the training. The methods are robust to the most sophisticated attacks and achieve, on average, a 25% increase in top-1 accuracy on the CIFAR-10 dataset over defenses suggested by prior work. They maintain training convergence even when 30% of the devices behave adversarially, and the corresponding reduction of the fraction of corrupted gradients ranges from 16% to 99%.
Supervisor: Prof. Aditya Ramamoorthy.
- MAY 2017 Department of Electrical and Computer Engineering,
- APRIL 2020 Iowa State University.
Project: Speeding up Distributed Computing via Coding
Description: Developed algorithms to reduce *MapReduce* communication time across the servers on the *AWS EC2* platform. The protocol uses *Single Parity Check* codes and design theory constructions to assign tasks to servers and splits files less finely than prior work. Tweaked the baseline *TeraSort* algorithm, popular for sorting large datasets (generated and fetched within the *HDFS* system), and adapted it to our scheme. Our method uses *MPI* to facilitate server communication and achieves significant speedups of up to 4.7 \times . Extended this work to the case when the desired functions can be aggregated (amenable to deep learning applications). Its speedup is 4.3 \times over the baseline approach. The latter work on *aggregated MapReduce* achieves state-of-the-art communication load but with an exponentially smaller requirement on the minimum number of jobs.
Supervisor: Prof. Aditya Ramamoorthy.

INDUSTRY EXPERIENCE

SEPTEMBER 2022 **Software Engineer at C3 AI**

- PRESENT I am a member of the Platform - Data team working on machine learning infrastructure problems.

MAY 2022 **Software Engineer Intern at Meta (Facebook)**

- AUGUST 2022 Developed multiple debugging tools for machine learning feature authoring used in the data pipelines of Facebook Marketplace. The main component was a framework that categorizes errors during feature compilation, generates alerts, and assigns tasks to the appropriate team; this framework was integrated with the CI/CD. Another end product of my work was an internal UI tool to fetch and display feature values from low-latency storage after a series of transformations.

JUNE 2021 **Software Engineer Intern at C3 AI**

- AUGUST 2021 Implemented an end-to-end framework for cluster failure prediction; the framework has two components. The first is the data pipeline which loads cluster health metrics, handles missing data, and creates a training data set. The second component is the ML pipeline which trains a model and makes predictions regarding the cluster's state as soon as new test data becomes available. Followed the process of continuous integration / continuous deployment (CI/CD).

PUBLICATIONS

Preprint

- K. Konstantinidis and A. Ramamoorthy, "Efficient Detection and Filtering Systems for Distributed Training," (preprint), 2022.

AWARDS

- APRIL 2022 **Research Excellence Award**
Iowa State University, Ames, IA.
- JUNE 2019 **Best Student Poster Award** ([link](#))
Midwest Machine Learning Symposium (MMLS), Madison, WI.
- APRIL 2019 **Teaching Excellence Award**
Iowa State University, Ames, IA.
- JUNE 2018 **Graduate Scholarship**
Gerondelis Foundation, Lynn, MA.
- MARCH 2018 **John Hatsios and Andromache Tsandes Award**
Iowa State University, Ames, IA.

SEMINAR

- JULY 2020 **Speeding Up Distributed Computing via Coding** ([video](#))
Dependable Data-Driven Discovery (D4) Institute, Ames, IA.

REVIEWING SERVICE

- *IEEE* Transactions on Information Theory (TIT) (2022).
- *IEEE* Transactions on Communications (TCOM) (2022, 2020, 2019).
- *IEEE/ACM* Transactions on Networking (ToN) (2021).
- International Conference on Artificial Intelligence and Statistics (AISTATS) (2023).
- *IEEE* International Symposium on Information Theory (ISIT) (2021, 2020, 2019).

UNDERGRADUATE INTERNSHIP AND RESEARCH EXPERIENCE

- AUGUST 2016 School of Mineral Resources Engineering,
Technical University of Crete.
Worked at Geodesy & Geomatics Lab.
Project: Development of an Android app that stores geodesy measurements on server.
Supervisor: Grad. student Dimitrios Galanakis.
- JULY 2016 School of Mineral Resources Engineering,
Technical University of Crete.
Interned at SenseLab Laboratory.
Project: Representation of a cylindrical geological core in horizontal plane.
Supervisor: Assist. Prof. Panayotis Partsinevelos.
- JANUARY 2015 School of Electrical and Computer Engineering,
Technical University of Crete.
Carried out research on probabilistic graphical models.
Project: Implementation of forward/backward inference (Viterbi) as well as learning
(Baum Welch) algorithms on the Dishonest Casino problem.
Supervisor: Assoc. Prof. Aggelos Bletsas.

SELECTED GRADUATE COURSEWORK

The following is a partial list of the graduate coursework I have completed at Iowa State University.

- **COMS573: Machine Learning**
Grade: A.
- **EE525X: Data Analytics in Electrical and Computer Engineering**
Grade: A.

- **EE523: Random Processes for Communications and Signal Processing**
Grade: A.
- **EE526X: Deep Learning**
Grade: A-.
- **COMS525: Numerical Analysis of High Performance Computing**
Grade: A.

SELECTED UNDERGRADUATE COURSEWORK

The following is a subset of the coursework I have completed at the Technical University of Crete.

- **TEL416: Information Theory and Coding**
Grade: 10/10.
- **TEL415: Statistical Signal Processing for Telecommunications**
Grade: 10/10.
- **TEL606: Probabilistic Graphical Models (graduate course)**
Grade: 8/10.
- **TEL413: Convex Optimization**
Grade: 8.5/10.
- **TEL414: Modeling and Performance Evaluation of Communication Networks**
Grade: 10/10.

SKILLS

Programming Languages

Proficient: Python, SQL, MATLAB, **Good:** C++, Java, Bash, PHP.

Interfaces/Frameworks

Proficient: AWS, PyTorch, NumPy, MPI, MapReduce, **Good:** scikit-learn, Hadoop, HDFS, Git, Jenkins, Splunk.

Networking

FTP, SSH, DDNS, VPN, WOL.

Miscellaneous

Windows, Linux, Excel, L^AT_EX.

VOLUNTEERING

SEPTEMBER 2021 **Mathematics Tutor for CyMath Kids**

- MAY 2022 Taught mathematics to 3rd-grade students on a weekly basis. The lessons involved creative problem solving as well as different methods to approach a problem by means of fun challenges. The program is part of the Iowa State University [4U Promise](#) initiative aiming to inspire and motivate students with an increased interest in STEM fields in their early years of education.
