

# KONSTANTINOS KONSTANTINIDIS

Ph.D. Candidate  
Department of Electrical and Computer Engineering  
Iowa State University  
Ames, IA 50011

## PERSONAL INFORMATION

---

📍 ADDRESS: 3133 Coover Hall, 2520 Osborn Dr., Ames, IA 50011  
☎ PHONE: 515-357-2016  
✉ EMAIL: [k.m.konstantinidis@gmail.com](mailto:k.m.konstantinidis@gmail.com)  
🔗 WEBSITE: [kkonstantinidis.github.io](http://kkonstantinidis.github.io)  
🐙 GITHUB: [github.com/kkonstantinidis](https://github.com/kkonstantinidis)  
🎓 GOOGLE SCHOLAR: [https://scholar.google.com/citations?user=pLi\\_5zwAAAAJ&hl=en](https://scholar.google.com/citations?user=pLi_5zwAAAAJ&hl=en)

## EDUCATION

---

JANUARY 2017 **Ph.D. in Electrical and Computer Engineering**  
- DECEMBER 2022 Department of Electrical and Computer Engineering,  
(expected) Iowa State University, Ames, IA.  
Advisor: Professor Aditya Ramamoorthy.  
Current GPA: 3.94/4.0.

SEPTEMBER 2011 **Diploma in Electrical and Computer Engineering (5-year program)**  
- DECEMBER 2016 School of Electrical and Computer Engineering,  
Technical University of Crete, Chania, Greece.  
Thesis: “*Fast Synchronization of OQPSK Signals.*”  
Advisor: Professor George N. Karystinos.  
GPA: 3.4/4.0.

## RESEARCH INTERESTS

---

- Distributed Computing.
- Machine Learning.
- Network Coding.

## ACADEMIC EXPERIENCE

---

- JANUARY 2017    **Graduate Research Assistant**  
- PRESENT    Application of Coding Theoretic Techniques to Robust Machine Learning and Distributed Computing.  
Iowa State University.
- FALL 2020    **Graduate Teaching Assistant**  
EE 571: Convex Optimization  
Enrollment: 20+ students  
Iowa State University.
- SPRING 2019    **Graduate Teaching Assistant**  
EE 322: Probabilistic Methods for Electrical Engineers  
Enrollment: 70+ students  
Iowa State University.
- FALL 2018    **Graduate Teaching Assistant**  
EE 322: Probabilistic Methods for Electrical Engineers  
Enrollment: 50+ students  
Iowa State University.  
Received the Teaching Excellence Award upon nomination of the instructor.

## GRADUATE RESEARCH EXPERIENCE

---

- JANUARY 2020    Department of Electrical and Computer Engineering,  
- PRESENT    Iowa State University.  
**Project:** Robust Distributed Learning  
**Description:** Developed novel filtering and detection mechanisms for distributed deep learning scenarios in which computing devices may return erroneous or malicious gradients which can derail the training. *Coding-theoretic* ideas are paired with *design theory* to minimize the fraction of corrupted computations. *Graph theory* is combined with computational redundancy to optimally assign tasks to devices and *clique-finding* allows for detection and exclusion of misbehaving devices from the training. The methods are robust to the most sophisticated attacks and achieve on average a 25% increase in top-1 accuracy on the CIFAR-10 dataset over defenses suggested by prior work. They maintain training convergence even when 30% of the devices behave adversarially and the corresponding reduction of the fraction of corrupted gradients ranges from 16% to 99%.  
**Supervisor:** Prof. Aditya Ramamoorthy.
- MAY 2017    Department of Electrical and Computer Engineering,  
- APRIL 2020    Iowa State University.  
**Project:** Communication-Efficient Distributed Computing  
**Description:** Developed algorithms to reduce *MapReduce* communication time across the servers on the *AWS EC2* platform. The protocol uses *Single Parity Check* codes and design theory constructions to assign tasks to servers and splits files less finely than prior work. Tweaked the baseline *TeraSort* algorithm, popular for sorting large datasets (generated and fetched within the *HDFS* system) and adapted it to our scheme. *MPI* is used to facilitate communication among the servers and achieves significant speedups of up to  $4.7\times$ . Extended this work to the case when the desired functions can be aggregated (amenable to deep learning applications). Its speedup is  $4.3\times$  over the baseline approach. The latter work on *aggregated* MapReduce achieves state-of-the-art communication load but with an exponentially smaller requirement on the minimum number of jobs.  
**Supervisor:** Prof. Aditya Ramamoorthy.

## INDUSTRY EXPERIENCE

---

- JUNE 2021    **Software Engineering Intern at C3.ai**
- AUGUST 2021    Implemented an end-to-end framework for cluster failure prediction; the framework has two components. The first one is the data pipeline which loads cluster health metrics, handles missing data and creates a training data set. The second component is the ML pipeline which trains a model and makes predictions regarding the cluster's state as soon as new test data becomes available. Followed the process of continuous integration / continuous deployment (CI/CD).

## PUBLICATIONS

---

### Preprint

- K. Konstantinidis and A. Ramamoorthy, "Aspis: Robust Detection for Distributed Learning," (preprint), January 2022.  
Available online: <https://arxiv.org/abs/2108.02416>

### Journal papers

- K. Konstantinidis and A. Ramamoorthy, "[Resolvable Designs for Speeding up Distributed Computing](#)," *IEEE Transactions on Networking (ToN)*, May 2020.  
Source code: [Source code](#)
- L. Tang, K. Konstantinidis and A. Ramamoorthy, "[Erasure Coding for Distributed Matrix Multiplication for Matrices With Bounded Entries](#)," *IEEE Communications Letters*, January 2019.  
[Source code](#)

### Conference papers

- K. Konstantinidis and A. Ramamoorthy, "[ByzShield: An Efficient and Robust System for Distributed Training](#)," *Machine Learning and Systems (MLSys)*, April 2021.

## AWARDS

---

- JUNE 2019    **Best Student Poster Award** ([link](#))  
Midwest Machine Learning Symposium (MMLS), Madison, WI.
- APRIL 2019    **Teaching Excellence Award**  
Iowa State University, Ames, IA.
- JUNE 2018    **Academic Excellence Award**  
Gerondelis Foundation, Lynn, MA.
- MARCH 2018    **John Hatsios and Andromache Tsandes Award**  
Iowa State University, Ames, IA.

## SEMINAR

---

- JULY 2020    **Speeding Up Distributed Computing via Coding** ([video](#))  
Theoretical and Applied Data Science Initiative, Ames, IA.

## REVIEWING SERVICE

---

- *IEEE* Transactions on Communications (TCOM) (2022, 2021, 2020, 2019).
- *IEEE* International Symposium on Information Theory (ISIT) (2021, 2020, 2019).

## UNDERGRADUATE INTERNSHIP AND PROJECT EXPERIENCE

---

- AUGUST 2016 School of Mineral Resources Engineering,  
Technical University of Crete.  
Interned in Geodesy & Geomatics Lab.  
Project: Development of an Android app that stores geodesy measurements on server.  
Supervisor: Grad. student Dimitrios Galanakis.
- JULY 2016 School of Mineral Resources Engineering,  
Technical University of Crete.  
Interned in SenseLab Laboratory.  
Project: Representation of a cylindrical geological core in horizontal plane.  
Supervisor: Assist. Prof. Panayotis Partsinevelos.
- JANUARY 2015 School of Electrical and Computer Engineering,  
Technical University of Crete.  
Carried out research in probabilistic graphical models.  
Project: Implementation of forward/backward inference (Viterbi) as well as learning  
(Baum Welch) algorithms on the Dishonest Casino problem.  
Supervisor: Assoc. Prof. Aggelos Bletsas.

## SELECTED GRADUATE COURSEWORK

---

The following is a partial list of the graduate coursework I have completed at Iowa State University.

- **COMS573: Machine Learning**  
Grade: A.
- **EE525X: Data Analytics in Electrical and Computer Engineering**  
Grade: A.
- **EE523: Random Processes for Communications and Signal Processing**  
Grade: A.
- **EE526X: Deep Learning**  
Grade: A-.
- **COMS525: Numerical Analysis of High Performance Computing**  
Grade: A.

## SELECTED UNDERGRADUATE COURSEWORK

---

The following is a subset of the coursework I have completed at the Technical University of Crete.

- **TEL416: Information Theory and Coding**  
Grade: 10/10.
- **TEL415: Statistical Signal Processing for Telecommunications**  
Grade: 10/10.
- **TEL606: Probabilistic Graphical Models (graduate course)**  
Grade: 8/10.

- **TEL413: Convex Optimization**

Grade: 8.5/10.

- **TEL414: Modeling and Performance Evaluation of Communication Networks**

Grade: 10/10.

## SKILLS

---

### Programming Languages

**Proficient:** Python, SQL, MATLAB, **Good:** C++, Java, Bash.

### Interfaces/Frameworks

**Proficient:** AWS, PyTorch, NumPy, MPI, MapReduce **Good:** scikit-learn, Hadoop, HDFS, Git, Jenkins, Splunk.

### Networking

FTP, SSH, DDNS, VPN, WOL.

### Miscellaneous

Windows, Linux, Excel, L<sup>A</sup>T<sub>E</sub>X.

## VOLUNTEERING

---

SEPTEMBER 2021    **Mathematics Tutor for CyMath Kids**

- MAY 2022    Taught mathematics to 3rd grade students. The lessons involve creative problem solving as well as different methods to approach a problem by means of fun challenges. The program is part of the Iowa State University [4U Promise](#) initiative aiming to inspire and motivate students with an increased interest in STEM fields in their early years of education.
